

Dear colleagues!

From **26 to 28 of April 2023**, on the basis of Research Station of the Russian Academy of Sciences in Bishkek city (RS RAS) the **XV International Youth Conference “MODERN TECNIQUE AND TECHNOLOGIES IN SCIENTIFIC RESEARCH”** will take place. Detailed information on this event will be taken on website <http://mmk.gdirc.kg/>

.

By the decision of the Organizing Committee of the Conference, **the acceptance of applications is extended until April 1, 2023.**

Registration and submission of materials for publication in the Proceedings of the Conference is carried out through the conference website (<http://mmk.gdirc.kg/>) in the "Registration" section.

THEME OF THE CONFERENCE:

Section "Integrated geological and geophysical studies of seismically active regions" includes reports on methods and new software systems used to monitor the geoenvironment and ionosphere, and on the results of their application, as well as reports on various kinds of

geoinformation systems.

Section "Natural and technogenic hazards" includes reports on the prevalence and features of manifestations of seismotectonic processes, landslides and mudflows in Central Asia. The same section also presents reports on man-made hazards associated with the operation of reservoirs and mining in seismically hazardous areas

Section "Interdisciplinary reports" is divided into two subsections:

"Mechanics" - includes reports on solving complex and dynamic problems in various areas of modern mechanics

"Interdisciplinary reports" - includes reports on the formulation and solution of problems of mathematical modeling of physical, economic and other processes, as well as on modern methods and technologies used in the processing of various kinds of data.

WORKING REGIME OF THE CONFERENCE: GYBRID FORMAT: oral (online) and poster (offline) reports

CONFERENCE LANGUAGES:
Russian and English

CONFERENCE GOALS:

- raising the level of scientific research and expanding the scientific horizons of young scientists, specialists, graduate students, undergraduates and students;
- integration of science and education;
- development of creative activity of young researchers;
- popularization of scientific research conducted at the Research Station of the Russian

Academy of Sciences.

PUBLICATION OF THE BOOK OF MATERIALS is expected in autumn 2023. The collection of materials of the Conference is registered with the Book Chamber of the Kyrgyz Republic, and is also indexed in the information and analytical system of the RSCI (<https://elibrary.ru/>).

!!! Students, graduate students and young scientists **under the age of 39** are invited to participate in the Conference.

!!! Participation in the Conference is free.

All the best,

Written by Administrator
