

Dear colleagues!

On Friday, **May 20, 2016, at 13:00** we invite everyone to visit regular scientific workshop. Within this workshop the Head of the Laboratory of Studying Modern Movements of the Earth's Crust by methods of Space Geodesy (LGPS), the candidate of physical and mathematical sciences

Kuzikov Sergey Ivanovich

will present the

LECTURE "The General Geological Concepts for Geophysical Surveys".

We are planning to discuss the following issues:

- definition of Geology and Geophysics, spheres of research;
- age of objects and duration of observations;
- relevance of geological data for geophysical surveys;
- important concepts from the General Geology: main types, origin and classifications of rocks; time scales;
- tectonic theories, fault and seismic belts;
- main types of geological maps of Kyrgyzstan;
- ratio of geological and geodetic data;

Scientific workshop
